FOR PLASTIC & METAL MATERIALS

Various Color

Polarized Effect Paints

Product Description

Various Color is a polarized-effect paint whose color changes according to the angle from which it is viewed. The standard base color is black, but changing the base color changes the color development significantly. You can also create your own original colors. Coating workability is at the same level as conventional metallic paint.

For metal substrates, the color can be developed with our Acryoh #4000 grade. For plastic substrates, it can be developed with our Polyrap G41, Ecoplus TFX81 series, Ecoplus G81 series and Ecotop #100 series grades.

Angle-Dependent Color
Polarized effect paint

Base Color Matters
Standard base color is black

Easy to Apply
Same workability as metallic paint

Plastics & Metals
Customer-specific colors available

TAIEI INDUSTRIES Co., Ltd.

We are a paint manufacturer specializing in the development and production of metallic paints for OEM automotive exterior and interior parts.

Examples of Use

Example ①
Acryoh #4000
Various01-5/BL5.0
(Customer-specific color)

Example ②
Polyrap G41
Various Color
(Customer-specific color)

Example ③
Ecoplus TFX81
Various Color
(Customer-specific color)

Applicable Paint Grades

For metals
Acryoh #4000

For plastics
Polyrap G41
Ecoplus TFX81 series
Ecoplus G81 series
Ecotop #100 series

The standard base color is black
Changing the base color greatly changes the color development

Basic Colors

Polarized Effect Paint “VARIOUS COLOR” — Basic Colors

The color changes according to the viewing angle.
All colors shown below are painted over a black substrate.
